PREFACE

The military facilities (see figure 2) described here are dispersed in the valley surrounding Chiu-Weng-Yuan, China (24 22N-113 49E).

The [ ] readout of the functional areas is included to show the status at that time and provide a base for changes since then.

Due to the obliquity of the photography for figures 3 through 6 no scales can be included.

The areas depicted in figures 3 and 4 are carried in the Bombing Encyclopedia as Chiu-Weng-Yuan Army Barracks SW [ ] and Chiu-Weng-Yuan Army Barracks NE [ ] respectively.

The following alphabetical designators are used to delineate functional areas within military installations.

- A. Billeting area
- B. Vehicle storage/maintenance
- C. General storage area
- D. Ammunition storage
- E. Miscellaneous (hospitals, prisons, POL, personnel training facilities and unidentified facilities)
- F. Small arms range
- G. Driver training area
- H. Support
- J. Tank/assault gun range
- K. Flat trajectory range
- L. Sub caliber range
- M. APC range
- N. Combined arms range
- P. Artillery training area
- Q. Infantry training area
- R. Special or unidentified area

- NOTE: 1. The absence of one or more alphabetical designators indicates that those functional areas were not observed at that particular installation.
2. Lower case letters (i.e., Ba) are used to delineate more than one area of a particular functional category.

#### SUMMARY

The fact that these military areas were not present on [redacted] photography and only partially present on [redacted] photography is of interest, particularly when considering some of the other facts mentioned below.

The dispersal of the functional areas appears significant especially if they are all part of one unit.

An interesting pattern, possibly for small units, was observed mainly in areas "Ab," "Ac," "Ad," and "Ak." These small separated areas were comprised of 3 probable barracks, one connected possible administration building and messhall and some small support buildings.

25X1

The dam for a reservoir, just north of area "Ag," was observed under construction on [redacted] photography.

A more detailed analysis of this area was limited by the small scale and obliquity of the [redacted] coverage.
